Reasons for allowable

Art Unit: 2841

6. The following is an examiner's statement of reasons for allowance: The examiner agrees with the applicant's remarks with the above amendments that the prior references art; Ford et al. (US 20040118466) and Meschenmoser (US 1157026), fail to disclose, teach, or fairly suggest that a combination of a specific solenoid and a specific lead frame which the solenoid is fitted into; in which, the solenoid has connector terminals with a web formed in between two terminals, and the lead frame has a pair of discrete projections and a pair of slots corresponding to the terminals, and the lead frame slots engage the terminals with the pair of discrete projections engaging opposite sides of the web. In combining of the references art, the references fail to disclose at least the discrete projections formed in between the slots engaging opposite sides of the web. Beside the prior references art, none of the relevant art of record discloses or teaches such the pair of discrete projections of a lead frame engaging opposite sides of the web of a solenoid.
